General Note

Except as otherwise noted, all trade figures in this publication are compiled from publications and official records, Bureau of the Census.

The term "foreign trade" applies to trade between the United States, including its territories, and foreign countries. Trade between continental United States and its territories is referred to as "shipments". Figures for shipments out of the territories include small quantities to other territories. In statistics of foreign trade, forest products and distilled liquors are considered nonagricultural products.

Exports under various special economic-aid programs are included in figures appearing in this publication, but separate figures are not being compiled by the Bureau of the Census on exports under these programs. Excluded from the export figures are shipments to the United States armed forces abroad for their own use, shipments between continental United States and the territories and possessions, and shipments between the territories and possessions. Excluded from the dollar value is any export subsidy paid to private United States exporters on shipments of domestically produced agricultural commodities.

In the classification of agricultural imports into supplementary and complementary groups, all those similar to agricultural commodities produced commercially in the United States and all others that are interchangeable in use to any significant extent with such United States commodities are considered supplementary. Complementary includes all others.

Available several months following the period covered by the statistics. Shows total quantity and value of monthly exports and imports of principal agricultural products and also cumulative figures from July 1; monthly quantity indexes adjusted for seasonal variations; monthly value of United States foreign trade in agricultural products; all with comparisons. (July issues carry tables that show, by months for the two preceding years, the quantity of selected agricultural exports and imports).

ANNUAL:
